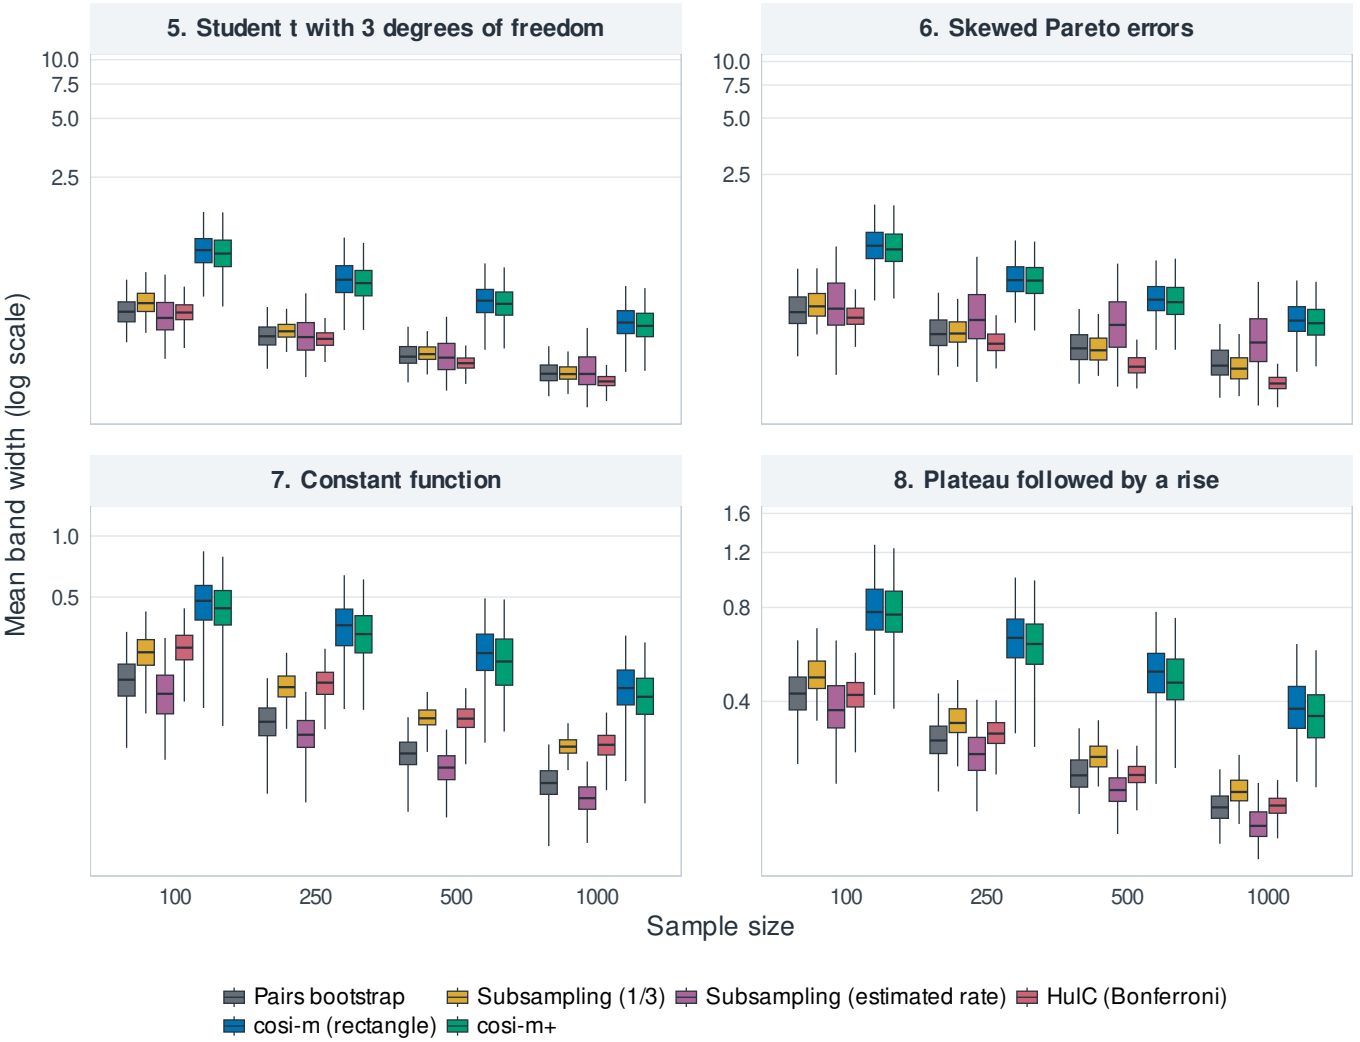
1. Linear, Gaussian
2. Curved exponential
3. Cubic, flat at the center
4. Heteroscedastic, beta design
Mean band width (log scale)
Sample size
100
250
500
1000
Pairs bootstrap
Subsampling (1/3)
Subsampling (estimated rate)
HulC (Bonferroni)
cosi-m (rectangle)
cosi-m+



5. Student t with 3 degrees of freedom
6. Skewed Pareto errors
7. Constant function
8. Plateau followed by a rise
Mean band width (log scale)
10.0
7.5
5.0
2.5

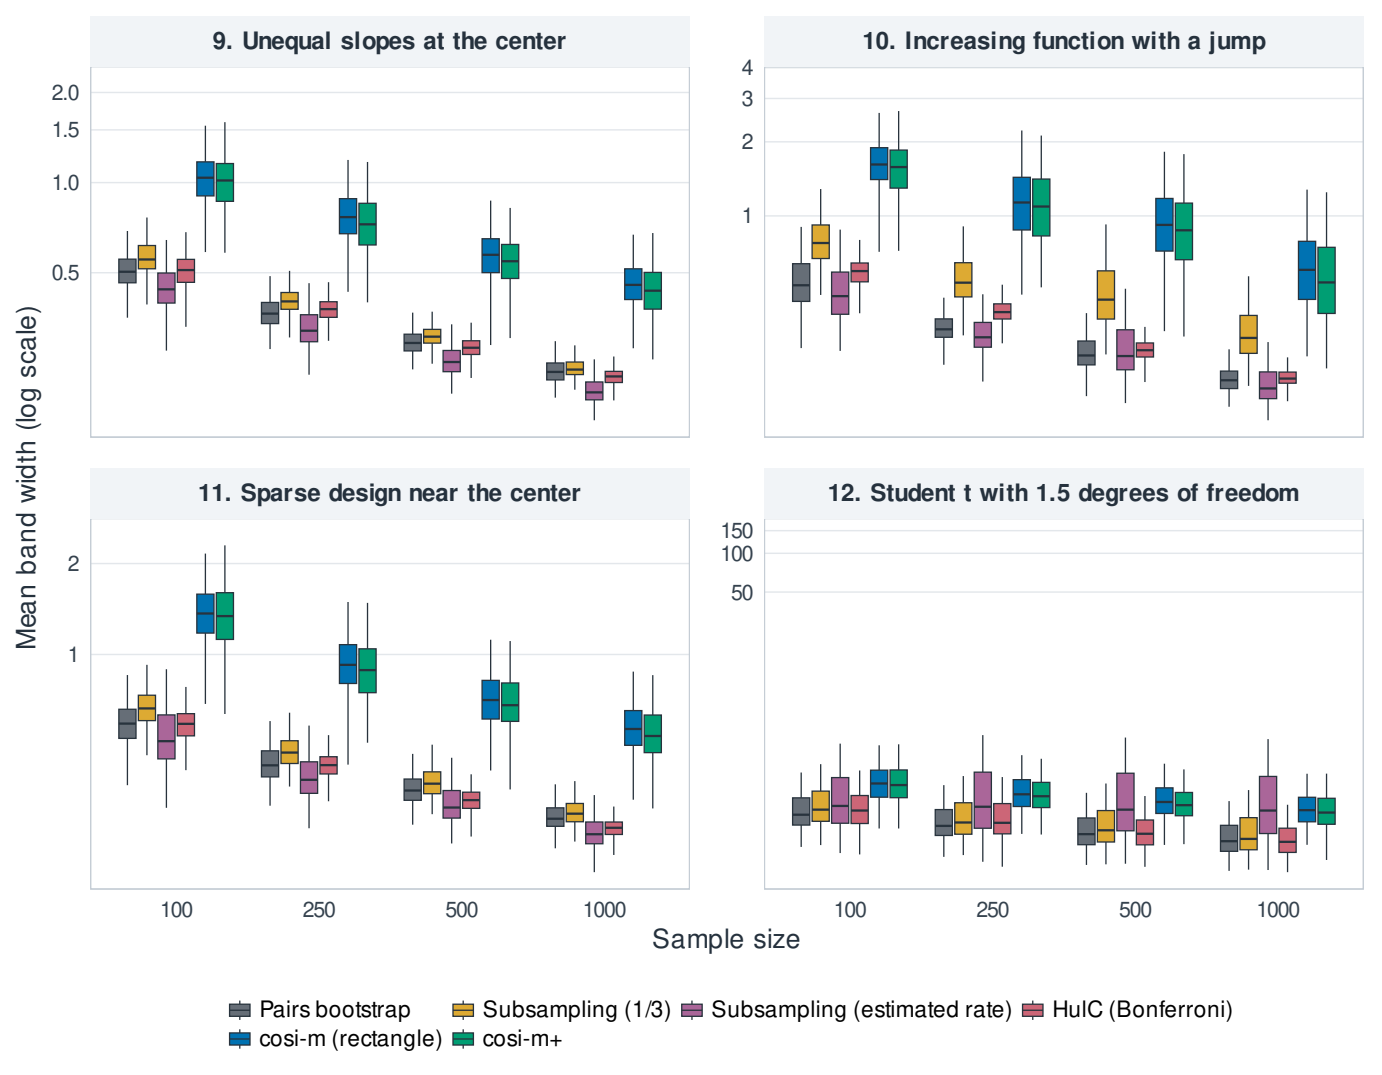
Sample size
Pairs bootstrap
Subsampling (1/3)
Subsampling (estimated rate)
HulC (Bonferroni)
cosi-m (rectangle)
cosi-m+



9. Unequal slopes at the center
10. Increasing function with a jump
11. Sparse design near the center
12. Student t with 1.5 degrees of freedom
Mean band width (log scale)
Sample size
100
250
500
1000
Pairs bootstrap
Subsampling (1/3)
Subsampling (estimated rate)
HulC (Bonferroni)
cosi-m (rectangle)
cosi-m+
